PROJECTS

- **Propforce (Angular, Node.js, MySQL, Sequelize)** – A platform for sales, used by Business development executives and HoDs of sales to keep track of investments and revenues. It also manages all the clients, sales units of properties and keeps track of the relationship of clients with the property @Zameen.com

- **LMS: Leads Management System (Angular, Node.js, MySQL, Objection)** – A portal to manage leads generated by social media platforms and Zameen website. Leads are then assigned to the Telesales force team and users to contact the clients (people interested in property) via phone calls to sell out the property @Zameen.com

- **StealthApp (Node.js, Pug, MongoDB)** – An application used by sales team to manage and make calls to clients (people interested in property) and then process the calls to make the leads mature for the sale of property. @Zameen.com

- **Terawatt (AngularJS, Angular 6)** – An educational website where users can purchase and sell courses for live educational sessions conducted by the expert instructors. @DevStudio
  URL: https://goterawatt.com/

- **CourseFrenzy (Angular 5, Angular Material, Django REST)** – An Auction Marketplace to connect Instructors and Students together for eLearning. Courses can be Sold, Bought, Rented or Bid on through an auction experience. @BrainPlow
  URL: https://www.coursefrenzy.com/

- **CramFrenzy (Angular 5, Angular Material, Django REST)** – An educational website where users can discuss questions and post their notes from lectures. It assists instructors in online teaching. @BrainPlow

URL: https://www.cramfrenzy.com/

- **No More (Ionic 3, Angular 6, Express.JS, Firebase)** – A mobile application that can be used to broadcast alerts in emergency situations, volunteers get notification and reach to help people by location tracking. Developed admin panel as well. @DevStudio

- **RightNow (Ionic 3, Angular 6, Firebase) –** A mobile application that provides events to users based on their location and interests and help users to share photos, connect and chat with other people from same events. Developed admin panel as well. @DevStudio

- **Online Entry Test Preparation Portal (Bootstrap, Laravel)** – An online portal which provides entry test preparation facilities, discussion platform and guidance about universities and the fields of study. Final Year Project for my Bachelors degree.

- **Gender Recognition from Handwriting System (Python, OpenCV)** Research project during my Bachelor degree.

Certifications

- Certification for Angular Development
- Node.js Certification
- Containers 101 - Docker
